Macintosh Update

Kristine DeNunzio
denunzk@ocps.net

Course Description:

Advanced overview of new computer technologies and programs on the Macintosh Computer.

Notice: This course assumes that students have an advanced understanding of the Macintosh user interface.

Text: No text is required for this course. All materials will be provided by the instructor.

Suggested Prerequisites: Macintosh OS X Tiger and experience with various software programs.

Topics to be addressed:

Each week of the class will cover a different topic. Lessons are given in a "hands-on" format or in the form of demonstrations and discussions.

Class time includes:

- Troubleshooting Techniques
- Class discussion of computer news
- Demonstrations of software and hardware
- Information on updates for applications and OS X
- Hands-on practice of various programs

*The instructor reserves the right to modify this course outline at any time.
