**iLife '09 (iPhoto, iMovie & iWeb)**

Kristine DeNunzio

[kristine.denunzio@ocps.net](mailto:kristine.denunzio@ocps.net)

**Course Description:**

This course overviews Apple's iLife '09 suite of applications and focuses on 3 of the main programs. iPhoto helps you organize, create & share your digital photos in a variety of ways. iMovie lets you create projects from videos or your still photos, adding text, transitions & more. With iWeb you can quickly create websites and blogs, complete with photos and movies, and get them online fast to your MobileMe account or other domain. (This course covers publishing to a MobileMe account; but students do not have to have a MobileMe account, since we will just be creating sample pages and not be publishing them online.)

**Text:** No text is required for this course. All materials will be provided by the instructor.

**Suggested Prerequisites:** None.

**Topics to be addressed:**

Students work along with the instructor, using provided sample files, and are guided, step-by-step, to learn the various features of the programs and create a variety of projects. Instructor will also discuss and provide demonstrations of advanced features and the other two programs included in iLife: GarageBand and iDVD.

Class time includes:

- Overview of the programs and their usage
- Importing & organizing your digital photos
- Editing techniques
- Creating slideshows, complete with music, effects and transitions
- Methods of sharing & exporting your projects
- Creating a basic movie project, along with titles and transitions
- Working with templates in iWeb to create webpages
- Learning how to integrate your media from entire computer into projects
