Course: Web Design Level 2

Course Description:

Delve further into Web Design with this Intermediate course. Learn Intermediate to Advanced usage of Adobe's Dreamweaver CS3 software, intermediate HTML coding, intermediate CSS (Cascading Style Sheets) development and usage and publishing your final product online. Your final project will build upon what you have learned in Web Design 1 and conclude with enhancing your site, publishing to the internet and managing your site.

This course assumes that students have a basic understanding of the Windows user interface, the Internet and that the student has learned to name, save and retrieve files using a PC.

This is an intermediate web design course designed for users with some prior experience using Dreamweaver, CSS or HTML.

Text:

No text is required for this course. All materials will be provided by the instructor.
