Google Earth

Kristine DeNunzio
denunzk@ocps.net

Course Description:

This course overviews the Google Earth program (available for both Mac & Windows for free at <http://earth.google.com>). Google Earth lets you fly anywhere on Earth to view satellite imagery, maps, terrain, 3D buildings and even explore galaxies in the Sky. You can explore rich geographical content, get driving directions and save your toured places to easily visit them again.

Text: No text is required for this course. All materials will be provided by the instructor.

Suggested Prerequisites: None.

Topics to be addressed:

Students work along with the instructor, using provided sample files, and are guided, step-by-step, to learn the various features of the program.

Class time includes:

- Overview of the interface
- Finding various locations on earth
- Using Google Sky feature
- Getting driving directions
- Understanding layers to see more content
- Saving your visited locations
- Learning more online through Google help and forums

*The instructor reserves the right to modify this course outline at any time.
