Course: Web Design Level 1

Instructor: Jon Tryzbiak

Course Description:

Learn the basics of webpage construction in this introductory course. Web Design 1 will cover the basics of HTML coding, an introduction to CSS (Cascading Style Sheets) and will build to include a basic understanding of Adobe's Dreamweaver CS3 software to pull it all together. Your final project will include a synthesization of all your components where students will create a basic website to simple specifications.

This course assumes that students have a basic understanding of the Windows user interface, the Internet and that the student has learned to name, save and retrieve files using a PC.

This is an introductory web design course designed for users with very little to no prior experience using Dreamweaver, CSS or HTML.

Text:
